

DocConverter

High-Volume Document Conversion

DocConverter transforms hundreds of file types to and from PDF with superior fidelity and consistent reproduction. Optional output to, and validation of PDF/A ensures your documents will meet demanding standards-compliance requirements.

Newly added CADConverter functionality makes it easy to convert complex CAD files, such as drawings, plans and diagrams, to cross-platform PDF and PDF/A files.

DocConverter Features:

• Convert files to PDF

Convert user files directly to ISO standards-compliant PDF and PDF/A files. Existing PDF/A files can be validated to ensure compliance.

• Convert PDFs to editable and image formats

Convert PDFs to editable formats (Microsoft Word, Excel, PowerPoint, RTF, HTML, text) and image formats (TIFF, JPEG, BMP and PNG.)

• Network Watched Folders

Operates in batch mode via directory scanning for on-demand PDF conversion. Watched Folders are scanned allowing users to drag and drop files from the desktop to the server.

• Convert CAD Files to PDF Files

Newly added CADConverter functionality makes it easy to convert complex CAD files, such as drawings, plans and diagrams, to cross-platform PDF and PDF/A files.

• .NET and COM APIs

• Centralized PDF settings

• Multi-threaded

• Concatenate to existing

• PDF encryption

• Password protected files

• Digital signatures

• Stamping

• Linearization

• Document Filters

• PDF Metadata

• Email and FTP output options

Requirements:

Operating System

- Windows Server® 2012
- Windows Server® 2008

Additional Software Requirements

- Microsoft® Word, Excel, PowerPoint (2007 minimum, 2013 recommended)
- Microsoft® .NET Framework

Code Snippet:

Convert and Set Security - C#

```
// Define the Output folder
strPath =
    System.AppDomain.CurrentDomain.BaseDirectory;

// Set 128bit encryption: "UserPassword", "OwnerPassword",
// CanPrint, CanEdit, CanCopy, CanModify,
// CanFillInFormFields, CanMakeAccessible,
// CanAssemble, CanReproduce
oDC.SetSecurityOptions128(
    "userpass", "ownerpass",
    true, false, false, false, false, false, true);

// Convert the document to PDF
oDC.ConvertToPDF(
    strPath + "word.doc", strPath + "secureAES.pdf");
```
